New Designs at JK Jitka Kudláčková

In the new year, JK Jitka Kudláčková has introduced a new series of **pecially designed rings** that are produced in the goldsmith's workshop linked directly with their representative shop in the FILADELFIE shopping arcade.

The rings are ideal as engagement rings, but also as a gift for a new mother or other major life event. At first glance, these rings might not look like engagement rings - the most traditional engagement ring is considered to be white gold with a clear diamond. But JK offers a different take on classic jewelry... more colorful, more interesting. Explore the **JOY**, **DIVA**, and **TOLERANCE** lines, where you'll find not only clear diamonds, but also rings adorned with rubies, sapphires, aquamarines and pink diamonds.
