Unique Golden Egg on Display at JK Jitka Kudláčková

At the JK Jitka Kudláčková jewelry shop and goldsmith in the FILADELFIE building, a unique artifact was made that has no equal anywhere in the Czech Republic, in Europe, or probably in the world. The unique golden egg is proof that high-quality Czech craftsmanship still hasn't died, nor has pride in our country and its history.

The surface of the egg bears Mucha-style Art Nouveau motifs and the symbols of Bohemia, Moravia and Silesia are on the pedestal. Czech garnets, gold, diamonds, silver, moldavites, and mother of pearl were used, brass for the mechanism (the music box), as well as a bit of crude oil, as the client has a relationship to it. The pedestal is made of Czech linden wood. More specifically, the egg features 258 small diamonds, 47 Czech garnets, 6 moldavites, nearly 300 g of 14 karat gold, and nearly 200 grams of silver.

This unique piece will be on view at the JK Jitka Kudláčková shop from February 1 to 10 before it heads home to its private collection.
